

CHISAGO COUNTY (13)

Number of lakes 91
 Lake area, acres. 17,855

Most of the lake basins in the county were developed from buried ice blocks in glacial drift. A chain of lakes, which extends across the southern part of the county into Anoka County, originates from ice blocks deposited in a preglacial valley. This chain includes North and South Center Lakes, 13-27 and 13-32; Lindstrom Lakes, 13-28 and 13-35; Chisago, 13-12; Green, 13-41; and a number of small kettle hole lakes in the area. Rush, 13-69, was formed from a series of interconnected buried ice blocks.

Large lakes in the county include the following:

Name	Ident. no.	Area, acres
Rush	13-69	3,170
Sunrise River Addition (Pools 1 and 3)	13-59	2,354
Green	13-41	1,830
Chisago	13-12	930
South Center	13-27	913
Sunrise	13-31	810
North Center	13-32	760
Goose	13-83	710
South Lindstrom	13-28	664

The Sunrise River Addition to the Carlos Avery Wildlife Management Area contains the largest reservoir, 13-59, in Chisago County. It was formed by dams constructed on the Sunrise River and has a water area of 2,354 acres. A reservoir, 13-37, created by a dam on the Sunrise River at Kost, is a former private hydro-power reservoir which is now used as a state game refuge.
