

CLAY COUNTY (14)

Number of lakes 107
 Lake area, acres. 4,650

All of the lakes in the county are located in the morainal region along the eastern boundary. Nearly all were formed by ice blocks deposited in the glacial till. The remainder of the county consists of generally flat terrain devoid of lakes, which represents the old lake basin of Glacial Lake Agassiz.

The largest lake located entirely within the county is Lee, 14-49, which has an area of 148 acres. Tilde, 14-4, has a total area of 256 acres, but 110 acres of the lake are located in Becker County.

An artificial lake basin, Barnesville, 14-93, was formed by a dam constructed across Whiskey Creek in Barnesville before 1936.

Lakes classified by area

	Area in acres								Total
	10 to 25	25 to 50	50 to 75	75 to 100	100 to 125	125 to 150	150 to 200	200 to 500	
Number listed.	45	31	18	3	5	4	0	1	107
Number affected by drainage or dry.	1	1	1	0	0	0	0	0	3
