

# KOOCHICHING COUNTY (36)

Number of lakes . . . . . 24  
 Lake area, acres. . . . . 32,003

The lake basins in the southern part of the county were formed from ice blocks deposited in glacial till. The few lakes in the northern part of the county occupy depressions in the bed of former Glacial Lake Agassiz. These lakes are quite shallow and have been largely filled with organic sediments through bog succession. The dominant control appears to be the irregular depressions in the bedrock surface of the area where ice lenses were buried by glacial drift and later with lake sediments from Lake Agassiz.

Rat Root, 36-6, area 555 acres, is the largest lake entirely in the county. Nett, 36-1, has a total area of 7,369 acres, 4,650 of which is in Koochiching County.
