

LINCOLN COUNTY (41)

Number of lakes 110
 Lake area, acres. 14,958

Most of the lake basins in the county were formed by the irregular deposition of glacial till; examples are Cottonwood, 41-15, and Anderson, 41-54. Benton, 41-43, the largest lake in the county was formed from ice blocks deposited in glacial till which filled a preglacial valley. A chain of northwest trending lake basins in the east-central part of the county, including the following numbered lakes, 41-34, 41-33, 41-36, and 41-23, were probably formed from ice blocks deposited in till along a preglacial valley.

Many of the county lakes are affected by artificial drainage systems.

Large lakes entirely within the county include: Benton, 41-43, 2,875 acres, Shaokotan, 41-89, 1,043 acres; Dead Coon, 41-21, 555 acres; and, Cottonwood, 41-15, 501 acres.

Lakes classified by area
