

POLK COUNTY (60)

Number of lakes 332
 Lake area, acres. 18,242

The lakes in Polk County are all located in the moraine and glacial till plain areas in the eastern two-thirds of the county. The western one-third and northeastern corner of the county is in the old bed of Glacial Lake Agassiz. It is covered with glacial lake sediments and contains no lakes.

Most of the lake basins in the county were formed from ice blocks deposited in glacial till. Examples of basins formed by ice blocks are Turtle, 60-32; Union, 60-217; and Oak, 60-185.

Some basins were formed by the irregular deposition of glacial till. Uff, 60-119 is an example.

The largest lakes located entirely in Polk County include: Maple, 60-305, 1,445 acres; Union, 60-217, 910 acres; and Turtle, 60-32, 605 acres. Sand Hill, 60-69, is another large lake, total area 598 acres, but 100 acres is in Mahnomen County.

Lakes classified by area
