Wildlife Manager Report

The winter of 2022/2023 started in mid-December with deep snow and those conditions continued through mid-March in Deer Permit Area (DPA) 155. This long period of deep snow restricted the ability of deer to move to fresh forage. The success rates for both bucks and does held steady at a level that is lower than is desired. Additionally, the DPA completed the goal setting process with a desire to increase the deer herd by 25%. To move toward the 25% increase goal, Lottery (250) will be the designation in 2023.
