Wildlife Manager Report

The 2020 goal for deer permit area (DPA) 213 was to decrease the density of deer in the DPA by 25%. Density of deer tends to be higher in the Douglas County portion of this DPA which is consistent with the location of depredation complaints during winter and spring of 2022 and 2023. We received reports of winter mortality of fawns primarily in DPA 213 during the winter of 2022/2023, but given the excellent habitat in this DPA and ability of this herd to recover quickly, a three-deer limit will be implemented.
