

DEER PERMIT AREA 213 HUNTING INFORMATION

2020 Deer Hunting Information

Voluntary CWD Testing - Check www.mndnr.gov/cwd for details

Designation: Intensive: 3 deer limit

Firearm Options: See DPA Detail Map

Special Regulations: N/A

Seasons:

- Archery: Sept. 19 - Dec. 31
- Youth: Oct. 15 - Oct. 18
- Early Antlerless: Oct. 15 - 18
- Firearm A: Nov. 7 - Nov. 15
- Firearm B: N/A
- Muzzleloader: Nov. 28 - Dec. 13

Land Cover Types % Tot.

Woody Cover	17
Grassland and Wetlands	32
Annual Row Crops	36
Open Water	10
Developed	6

Total Land Area in 2019 (Non-water)

1059 Sq. Mi.

Lands Open to Public Hunting

Publically Owned Lands	Sq. Mi.
State Wildlife Management Area	12
State Forest	0
Misc. State Land	1
County Managed Land	0
USFWS Land (WPA and NWR)	20
USFS Land (National Forest)	0
Privately Owned Lands	
Forest Legacy/Forests for Future	0
Walk-In Access	2
Total for Public Hunting	35

Wildlife Manager Report

Deer Permit Area (DPA) 213 includes some of the best deer habitat in the Glenwood work area, with large wooded swamps, upland timber and mostly small farms with with livestock and grain crops. DPA 213 covers northeastern Douglas, western Todd, southern Otter Tail, the northeastern corner of Grant and small portions of Pope and Stearns Counties. Deer numbers in DPR 213 have been high for a number of years. In 2020, DPA 213 will again be designated for Intensive harvest. In addition, because of continuing high deer numbers, DPA 213 will have an Early Antlerless season in 2020. In early 2020, DNR received public input to revise deer population goals. The goal for DPA 213 is to reduce the population 25% from current levels. Deer numbers continue to be high in DPA 213, based on modelling and comments from the hunting and farming public. The combination of Intensive Harvest designation along with Early Antlerless hunting should drop the deer numbers in DPA 213 towards the new population goal. This DPA is within the West Central Surveillance Area where precautionary CWD sampling will be available to hunters who would like to voluntarily submit a sample starting on the opening day of the archery season until the goal for the surveillance area is reached. The goal is based on a total point system using a risk-based model for disease. Details on this model can be found at mndnr.gov/cwd. No carcass movement restrictions exist in this DPA.
