Wildlife Manager Report

Deer Permit Area (DPA) 229 includes much of eastern Wright County with a landscape of rolling hardwood and agricultural land interspersed with rivers and lakes. Historically, deer harvest management has alternated between conservative and more liberal management strategies. There are numerous small private land tracts that are off limits to hunting, due to landowner preferences, so a more aggressive hunting strategy for the entire permit area is often required to accomplish harvest goals. DPA 229 also borders DPA 701, the Twin Cities metropolitan area, where there is a five-deer limit. A three deer limit with early antlerless harvest designation will be in place this year to work towards a 25% herd reduction.
