## Wildlife Manager Report

Deer Permit Area (DPA) 258 contains large blocks of public forestland and a significant amount of private land as well. The area contains good forested deer habitat consisting of mixed conifer and deciduous forest, a variety of wetlands, and some agricultural fields. Deer densities in this permit area are still variable, higher in the western portion and on private land. On average, deer numbers are likely at the deer goal, but some public forest lands still have few deer. The more antlerless permits in the Lottery this year should allow more local deer management in areas with increasing numbers.
