Wildlife Manager Report

Deer Permit Area (DPA) 647 is located in the heart of the driftless area, a rugged region of bluffs and valleys that contains some of the state's best deer habitat. Most of DPA 647 is privately owned, but there are a few State Wildlife Management Areas (WMAs) and State Forest lands available for public hunting interspersed throughout the area. DPA 647 is a designated CWD Disease Management DPA. However, deer populations in DPA 647 appear to be above the goal set in 2021 to reduce the population by 25% based on buck harvest and hunter success rates. Thus, a 5-Deer limit with an Early Antlerless season designation will be implemented in 2025 in an effort to curb additional population growth and ultimately bring the population down to the intended goal. Hunters may tag up to three bucks in this DPA - one each with an archery, firearms, and/or muzzleloader license. Please refer to the hunting regulations for details regarding carcass movement restrictions, CWD sampling protocols, and DNR-provided carcass dumpsters and quartering stations.
