

Minnesota's Lake Superior Coastal Program

Addendum to 2021 Notice of Grant Opportunity

Addition of subject matter experts to Application Process

Published: 10/28/2020

After Coastal Program staff screen the submitted applications for eligibility, they will send the applications to subject matter experts to provide comments on the technical aspects of the project.

Coastal Program staff select two or three subject matter experts for each application. Selected experts sign both data sharing agreements and conflict of interest disclosures prior to receiving the application. After the application review is complete, you may request a copy of the comments for your application as well as a roster of all of the experts selected.

After the Coastal Program staff receive the comments from the experts, they will compile them and send to the Governor's Council on Minnesota's Coastal Program (Coastal Council).

The Coastal Council may use the comments in their review and scoring of the applications.
