Safe Drinking Waters. Definitions	144.382	Health MN Rules 4725, 4727	MLSCP	In force	Modified definition of public water supply	"Public water supply" means a system providing piped water for human consumption, and either containing a minimum of 15 service connections or 15 living units, or serving an average of 25 persons daily for 60 days of the year. "Public water supply" includes a collection, treatment, storage, and distribution facility under control of an operator and used primarily in connection with the system, and a collection or pretreatment storage facility used primarily in connection with the system but not under control of an operator has the meaning given to "public water system" in the federal Safe Drinking Water Act, United States Code, title 42, section 300f, clause (4).
