

Transfer Application for Farmed White-tailed Deer

35.155 FARMED CERVIDAE

Subd. 10. (c) The Department of Natural Resources (DNR) must not allow new registrations under this section for possessing white-tailed deer. This paragraph does not prohibit a person holding a valid registration under this subdivision from selling or transferring the person's registration to an immediate family member. A valid registration may be sold or transferred only once under this paragraph. Before the DNR approves a sale or transfer under this paragraph, the DNR must verify that the registration is in good standing and the eligible family member must pay a onetime transfer fee of \$500 to the DNR.

To transfer a White-tailed deer (WTD) herd, (1) complete this transfer application, (2) complete an inventory report and mail a check to the Department of Natural Resources. The farmed cervidae facility must then be inspected by the DNR to verify compliance with Minnesota Statutes 35.155 and Minnesota rules 1721.0370 to 1721.0420.

Facility Information	New Owner/manager Information
