- Complete the form after each hunt
- Use where you parked for location of the hunt
- Consider private industrial hunting land as public land
- Record only your harvest data (not group data).
- No matter who flushes a bird, if <u>you</u> see it or hear it, report it.
- Record each species pursued at a single location on separate lines
- If you move to a new county on the same day, record that hunt on a separate line
- Only record age pheasants if you are comfortable doing so:
  - For pheasant only record age using spur length as sex is known
- Upload all hunts into the app or webpage **by Jan 15th**
- www.dnr.state.mn.us/wildlife/sightings/upland-field-log
